## AUSTRIA PLANS SHARP REFORMS

Reduction of Government Payroll Seems Most Difficult Task.

VIENNA, Nov. 18.—The special commission of the League of Nations is now studying the draft of certain administrative and financial reforms which the Austrian government has placed in its hands. This project is designed to meet the conditions upon which the proposed league loan of about \$100,000,000, guaranteed on a percentage basis by six European nations, is predicated.

In its present shape the measure is tentative and, when finally amended and approved by the league, it will be placed before the national assembly for enactment into law.

The proposals are based on an estimate of the budget for 1923, and reckon on a deficit of about 322 million gold crowns. By the end of 1924 when the reforms have been carried

## Good Cakes

depend much upon the use of the best butter, one of the foremost food ingredients.

## BANQUET BETTER BUTTER

out, it is estimated that the budget will have been balanced around 237 million gold crowns, but to make this possible the league credits are necessary, primarily to cover the deficit of the first two years of the carrying out of the reforms.

The new taxation scheme is very drastic, involving increased revenue from every possible source. General reform in the railways is promised, the administrative machinery is to be reorganized, tariffs are to be raised, the free pass and cost price ticket evils are to be abolished, and the eight hour law is to be honestly applied.

Posts, telegraphs and telephones will be made to pay their way, and all

monopolies, such as salt and tobacco, will be made to pay a profit. Since the customs are in part security for the proposed credits, they will be placed on a gold basis, and from this a revenue of 80 million gold crowns is expected immediately, but by steady increases this will be raised to about 100 million by the end of the first year.

A general turnover tax of 12 per cent on luxuries and 2 per cent on ordinary articles is introduced, while taxation of ground property and buildings is to be raised to two-thirds of the pre-war rates.

Various administrative reforms, such as the consolidation of some gov-

ernment departments, others, and a general reduction of the civil list are to play their part in the plan as to the pruning of the civil list is a vague and nebulous. Indeed, it is admitted this last is a most formidable task, as this great body of 272,000 employees stands fast and is well organized.

In the main, the whole very much along the same lines that proposed by the Austrians of the reparations commission eighteen months ago as for a loan the commission undertake to find, and through.

## SPERRY

## Drifted Snow Flour

will be used exclusively at the Geo. A. Lowe Hardware Cooking School

Professor Becker, world famous as a chef, will use no other flour in Ogden. See the wonderful results that he secures with this excellent family flour. He will use it for Bread, Pies, Cakes and for Pastry of all kinds. Notice the fine big brown loaves after they leave the ovens. See the tempting pastry made from this flour.

## The Secret of Success

is first the cook, then next the flour. Without the finest of flour it is impossible to have the greatest success in baking. Sperry Drifted Snow Flour milled in Ogden, is made from selected wheat under strict laboratory tests to give uniform quality year in and year out.
